

Gas Station Intelligent Surveillance Solution

Gas stations are always under the threat of theft, armed robbery, vandalism and other damages. iSAFE offers the most advanced video analytics solutions.

Hold-up Detection - Facilitates gas station staff to alert police or security guard while under gun threat by using advanced hands-up detection technology.

Loitering Detection - Automatically identifies suspicious people or vehicles loitering around.

Virtual Fence - Automatically identifies suspicious intrusion when intruders cross the invisible fence.

Face Detection - Automatically captures driver face and keep event log for future drive-off suspect identification.

License Plate Detection - Automatically captures plate number image and keep event log for future drive-off car identification.
